Internet Programming – SECJ 3303

Assignment 2

Objective:
1- **To utilize Spring MVC framework to complete the project.**
2- **To update the connection with database (CRUD) using 3 types of approach:**
   - **JDBC**
   - **Spring JDBC**
   - **Hibernate**

From your Lab Exercise 4, previously the request page used the URL to manipulate the input data. While for the response page used console to display the data.

You are required to complete all request pages and response pages for Lab Exercise 4. Utilize the component of Spring MVC such as ModelAndView and other components to input and display the data.

Lesson 1, 2 & 3:
1-complete response pages for getAll, display in a table form.
2-complete request page and response page for getById.
3-complete request page and response page for add.
4-complete request page and response page for update.
5-complete request page and response page for delete.
